

Downloadable checklist — Water risk management in facilities: Legionella, terminal points and traceability

Audience: Facility managers, hotels, resorts, spas, maintenance providers, labs and risk teams · Region: Spain / European Union / Global buildings

Prepared for water microbiology, traceability and product selection conversations.

Checklist

- ☐ Create an asset inventory with unique point IDs.
- ☐ Classify aerosol-generating and high-risk points.
- ☐ Define sampling frequency and responsible supplier or team.
- ☐ Record maintenance, temperature and operational context.
- ☐ Link laboratory reports to asset records and actions.
- ☐ Track deviations, corrective actions and follow-up samples.
- ☐ Prepare inspection-ready evidence by site and asset.

Recommended links

- ☐ Request technical recommendation
- ☐ View AquaVerify products
- ☐ Request AquaVerify Cloud demo

Suggested next step

Use this checklist to prepare a product, platform, distributor or OEM discussion with AquaVerify.

This document is technical orientation material. Method validation, accreditation, competent authority requirements and the quality system of each organization remain decisive.
