

Downloadable checklist — RD 3/2023 and somatic coliphages: practical guide for water laboratories and operators

Audience: Water laboratories, municipal operators, utilities and consultants · Region: Spain / European Union

Prepared for water microbiology, traceability and product selection conversations.

Checklist

- ☐ Identify whether the program is regulatory, operational or investigative.
- ☐ Define raw water, treatment, distribution or point-of-use context.
- ☐ Document method reference, host strain, controls and acceptance criteria.
- ☐ Connect result interpretation with treatment stage and historical trend.
- ☐ Define who reviews, approves and receives the report.
- ☐ Keep evidence of corrective actions and follow-up sampling.

Recommended links

- ☐ Request technical recommendation
- ☐ View AquaVerify products
- ☐ Request AquaVerify Cloud demo

Suggested next step

Use this checklist to prepare a product, platform, distributor or OEM discussion with AquaVerify.

This document is technical orientation material. Method validation, accreditation, competent authority requirements and the quality system of each organization remain decisive.
