

Downloadable checklist — How to choose the right AquaVerify product for microbiological water analysis

Audience: Laboratories, quality teams, utilities, distributors and OEM partners · Region: Global

Prepared for water microbiology, traceability and product selection conversations.

Checklist

- ☐ Define the analytical question before selecting a product.
- ☐ List sample matrices, volumes, frequency and operational locations.
- ☐ Decide whether the output must be quantitative or presence/absence.
- ☐ Identify whether ISO/EPA-aligned method preparation is required.
- ☐ Document lot, operator, control and review requirements.
- ☐ Decide whether CoA, customer portal or audit trail are required.
- ☐ Map the selected product to a sector page and commercial next step.

Recommended links

- ☐ Request technical recommendation
- ☐ View AquaVerify products
- ☐ Request AquaVerify Cloud demo

Suggested next step

Use this checklist to prepare a product, platform, distributor or OEM discussion with AquaVerify.

This document is technical orientation material. Method validation, accreditation, competent authority requirements and the quality system of each organization remain decisive.
