

Downloadable checklist — ISO/IEC 17025 for water laboratories: chain of custody, CoA and digital traceability

Audience: Laboratory directors, quality managers, senior technicians and distributors ·

Region: Global

Prepared for water microbiology, traceability and product selection conversations.

Checklist

- ☐ Map every handoff from request to CoA.
- ☐ Define mandatory fields for sample identity and preservation.
- ☐ Record method version, controls, product lot and operator.
- ☐ Separate result entry, technical review and report release roles.
- ☐ Keep timestamps and change history for critical actions.
- ☐ Connect CoA delivery with customer portal or documented communication.

Recommended links

- ☐ Request technical recommendation
- ☐ View AquaVerify products
- ☐ Request AquaVerify Cloud demo

Suggested next step

Use this checklist to prepare a product, platform, distributor or OEM discussion with AquaVerify.

This document is technical orientation material. Method validation, accreditation, competent authority requirements and the quality system of each organization remain decisive.
