

LIMS, CoA and audit trail checklist

Evaluate whether the current workflow captures sample, method, batch, operator, review, report and customer portal.

Prepared for water microbiology, traceability and product selection conversations.

Sample-to-report traceability

- ☐ Check that each sample has customer, site, matrix, date, operator and status.
- ☐ Link method, product, batch, instrument or bench evidence to the result.
- ☐ Require technical review before CoA or customer portal release.

Audit trail and permissions

- ☐ Define who can create, edit, review, approve and publish records.
- ☐ Keep timestamps for key changes and report generation.
- ☐ Separate draft data, reviewed data and released reports.

Commercial and customer workflow

- ☐ Connect CRM account, request, quote, work order, sample and report.
- ☐ Prepare customer portal access, report downloads and communication history.
- ☐ Track repeat requests, sectors, products and support context.

Suggested next step

Use this checklist to prepare a product, platform, distributor or OEM discussion with AquaVerify.

This document is technical orientation material. Method validation, accreditation, competent authority requirements and the quality system of each organization remain decisive.
