

EU Directive / RD 3/2023 checklist

Preparation guide for sampling points, risk assessment, somatic coliphages, records and evidence.

Prepared for water microbiology, traceability and product selection conversations.

Risk-based monitoring

- ☐ Map catchment, source water, treatment barriers and network points where evidence is needed.
- ☐ Identify when somatic coliphage monitoring supports risk assessment conversations.
- ☐ Separate legal requirement, internal surveillance and technical verification objectives.

Records and review

- ☐ Prepare sample point history, method reference, result units and action thresholds.
- ☐ Capture raw data, batch, operator and review status in the same evidence chain.
- ☐ Keep notes on treatment changes, incidents, seasonality and follow-up sampling.

Reporting package

- ☐ Define who receives the report, which format is needed and how corrective actions are documented.
- ☐ Link laboratory result, customer account, location and deliverable.
- ☐ Prepare a concise summary for technical, quality and management stakeholders.

Suggested next step

Use this checklist to prepare a product, platform, distributor or OEM discussion with AquaVerify.

This document is technical orientation material. Method validation, accreditation, competent authority requirements and the quality system of each organization remain decisive.
